Verifiable Funding Pack

Binh Duong Timberworks Co., Ltd. (SYNTHETIC)
for Partner Factor (FCI two-factor model, MOCK)

Pack	PACK-CA7637FA
Invoice	INV-1030
Product	Factoring INV-1030 (Partner Factor, MOCK)
Funds requested	USD 48,000.00
Prepared	2026-10-19 07:01 UTC
Forecast run	fc-0017

How to check this pack

Every figure in this pack is computed by deterministic code, not written by a language model. Each source document is fingerprinted with SHA-256. The bundle hash on page 5 covers all document hashes and all locked metrics, so changing any of them changes the bundle hash. The appendix lists the formulas so the figures can be recomputed by hand.

1. Cover letter

Dear Partner Factor (FCI two-factor model, MOCK),

Binh Duong Timberworks Co., Ltd. (SYNTHETIC) asks to fund invoice INV-1030 (Kyoto Interiors K.K. (SYNTHETIC)) through Factoring INV-1030 (Partner Factor, MOCK). The invoice has a face value of USD 60,000.00 and falls due in 60 days. We request USD 48,000.00. Our weekly cash forecast shows a cash shortfall of USD 42,831.63 in week 7 [source: forecast run fc-0017]. The estimated annualised cost is 17.1%. The attached pack lists the SHA-256 hash of every source document and the registry check shows this invoice has not been financed before.

Synthetic demo data.

2. Locked metrics

These figures were frozen when the pack was prepared. The cover letter may state only these numbers.

12-month revenue	USD 4,615,385.00

Lender reference (MOCK)	MOCK-35FCEC249D

A registry held inside one company's systems cannot stop the same invoice being financed at a second lender. In production it must be shared, for example run by a lender consortium or anchored to the e-invoice authority.

5. Appendix: recompute me

What causes the shortfall

30% deposit on PO-2214	USD 27,600.00
INV-1023 (Oakline Home LLC (SYNTHETIC)) is likely late: 86% chance of on-time payment	USD 3,094.00
INV-1026 (Oakline Home LLC (SYNTHETIC)) is likely late: 27% chance of on-time payment	USD 22,980.40
INV-1027 (Oakline Home LLC (SYNTHETIC)) is likely late: 57% chance of on-time payment	USD 11,782.00
INV-1034 (Shenzhen Greenhome Trading Ltd. (SYNTHETIC)) is likely late: 73% chance of on-time payment	USD 7,959.81
INV-1042 (Oakline Home LLC (SYNTHETIC)) is likely late: 87% chance of on-time payment	USD 2,906.28
INV-1044 (Oakline Home LLC (SYNTHETIC)) is likely late: 85% chance of on-time payment	USD 3,444.00
7 other invoices/orders likely paid late (each under USD 2,000)	USD 5,260.12
Opening cash plus scheduled inflows (invoices and confirmed orders), net of fixed costs and payroll	USD -42,194.98

Quantity	Formula and inputs
Cash conversion cycle	CCC = DIO + DSO - DPO = 35 + 75 - 28 = 82 days (from the ledger)
Annualised cost	APR = total cost / net funds received x 365 / days outstanding. This product: total cost USD 1,351.23, funds USD 48,000.00, 60 days, APR 17.12%. Net funds are the amount received after any upfront fee.
13-week forecast	Expected inflow = invoice value x chance of on-time payment, in the due week; the late share arrives four weeks later. Closing = opening + inflows - outflows. First shortfall = first week with closing below zero.
3-way match	Invoice and purchase order amounts within 0.01; quantity, package count, ports and buyer must agree.
Registry key	SHA-256 of seller tax ID | invoice no | buyer | currency | amount in minor units | issue date.
Bundle hash	SHA-256 of canonical JSON {documents: document hashes, metrics: locked metrics}, keys sorted, no spaces.

Bundle SHA-256: ca7637fa9e28269c01e528ad1aa555faf6b12a0617d865b908010f1bc360c162
